VIRGINIA: In the Clerk's Office of the County Court of Appomattox, October the 29th day of October, 1948.

McKinley Johnson Plaintiff
vs
H. W. McKinney, Sheriff Appomattox Co. & Admr. of Annie D. Johnson, dec'd, Ezra Clark, Harold J. Marshall, Ezra E. Marshall, Rosa Bell Lowery, Annie May Marshall, Elizabeth Scruggs, Beulah Gordon, Eldridge N. Jeolin, and all of the unknown heirs of Annie D. Johnson, dec'd Defendants,

The object of this suit is to settle the estate of Annie D. Johnson, deceased, to clear up all of the liens against certain real estate at Appomattox, Va., lying on Highway 131 and 460 and containing slightly more than one acre, owned by the plaintiff and the heirs at law of Annie D. Johnson; to sell the said real estate for the purpose of paying liens and for partitioning the net proceeds thereof between the parties to this suit as their interests appear, and for incidental relief.

And it appearing by affidavit filed that Ezra Clark, Harold J. Marshall, Ezra E. Marshall, Rosa Bell Lowery, Annie May Marshall, Elizabeth Scruggs, Beulah Gordon, Eldridge N. Jeolin, and all of the other heirs at law of Annie D. Johnson, deceased, whose names and residences are unknown, are not residents of Virginia, or are unknown, they are hereby required to appear within ten days after the due publication of this order and do what is necessary to protect their interests.

New Use for Nylon Plastic

Widespread use of nylon plastic —basically the same material that goes into women's stockings—in working parts of light machinery and equipment is forecast by plastics experts of Du Pont company. Indicative, they said, of a trend toward molded nylon parts that in some applications outwear metal and require no lubrication, was adoption of the material for wheel bearings in a new line of baby carriages. While this was one of the first bearing applications of nylon to go into commercial production, many other bearing and gear uses are being evaluated and its early adoption is expected in friction parts of light electrical equipment, such as food mixers and shavers.

Change Light Colored Finish

When a light oak or other light colored finish is to be changed to a mahogany or other dark colored finish, remove all of the old finish with paint and varnish remover. Then wash well with turpentine or mineral spirits to remove all traces of the paint and varnish remover, let dry thoroughly and sand lightly with very fine sandpaper to obtain a smooth surface. Then apply wood stain of the desired color. This can be determined by referring to a color card for stains. When stained to the desired color finish with two coats of clear varnish. In the case of a floor or stair tread which are being refinished in this way, floor varnish should be used, following the staining.

Scourge of Africa

Tsetse fly spreads sleeping sickness and is still a scourge in Africa. In the 1900's it decimated central Africa. The fly needs shade to breed, and large land areas have been cleared in extermination campaigns. The parklike region around Ripon Falls, Africa, has been completely deforested by man, and is healthful, but below Owen Falls sleeping sickness thrives in the uncut wilderness along the Nile. Despite this scourge, areas of Uganda, Kenya and Tanganyika surrounding Lake Victoria are among the most densely settled in Africa, sometimes reaching 1,000 persons per square mile.

Ingenious Machine Reveals Age and Growth of Fishes

Ingenuity of a couple of Kentucky division of game and fish workers has proved a boon to future operations. Leonard Joeris, aquatic biologist, and Robert Prather, assistant chemist, have devised a machine for projecting microscopic objects on a screen so that features are plainly discernible to even the layman's eye.

The machine is called a microprojector and will see much service by the division in the future. The microprojector has three principal uses.

1—It projects microscopic and macroscopic objects on a screen so that they may be more clearly observed.

2—It is used in counting and identifying plankton from steam and lake water (much of which is fish food).

3—It is used to discover the age and rate of growth of fishes from various bodies of water. This is accompanied by projecting a scale from the fish on the screen.

Total cost of the machine was approximately $15.

Modern Pied Piper Lures Rats to Death With Clever Devices

VANCOUVER, B. C.—James G. Anderson lures rats to extinction with cunning alone.

"If you know rat psychology," said the rodent wrecker, "you can't miss."

The secret, he says, is that rats are cowards.

One day Andersen and a recording engineer caught 50 rodents in a rat round-up in a Vancouver warehouse. They poked and prodded the prisoners till they began to squeal. Then they recorded their cries.

The amplified recording was played back in the warehouse. Terrified rats stampeded from the building.

This is the chase 'em away technique. But then Anderson came up with an even more diabolic device.

He and the engineer trapped a lady rat and recorded her lonesome wail. They took the record to another warehouse and turned it on full blast. Gentleman rats came rushing from their ratholes to their doom.

Anderson shoots trapped rats with a special pistol.

He inherits his talent from his father, John Anderson, a rodent exterminator before him. James runs a pest exterminating business, but specializes in rodents.

Given 50 men, James thinks he can clean every last rat out of Vancouver.

"I'll either catch 'em," said he, "or run them out of town."

Droutb Delays Planting of Wheat, Department Announces

WASHINGTON. — The agricultural department said in a grim report on wheat and corn prospects that the long drouth in most of the Great Plains states has "seriously delayed" planting of the 1948 winter wheat crop.

It is said that more than half of the winter wheat belt, which normally produces three-fourths of the nation's entire crop, has been hit by drouth. It added that conditions are most critical in the one-time Dust Bowl of the Southwest.

Dabney Gilliam, of Lynchburg, was a week-end guest of friends here.

Mr. and Mrs. Thomas Jamerson, of Newport News spent last week-end with relatives here.

Investigators Uncover Canadian Baby Selling

ST. JOHNS, N. B.—A baby buying and selling racket, so vast that its operations extended into the United States, has been uncovered—and at least temporarily put out of business — in the quiet Canadian province of New Brunswick.

It bought babies from unwed mothers at prices ranging from $25 to $100, and peddled them to anyone who could pay from $500 to $1,500 and not ask too many questions.

Even married women are said to have sold their infants to these merchants of infant flesh. One woman, according to police evidence, gave up a set of twins for a handful of cash.

So well organized was the ring that it literally had "buyers" on the road. These "buyers" were women, too, and it was their job to contact potential baby sellers in the final stages of pregnancy. They would guarantee payment of maternity expenses, and a specific sum for the new-born baby.

Not too much is known about the identities of the St. Johns bay traffickers, but the famed mounties of the Royal Canadian police force and the internationally celebrated American FBI are taking care of this angle.

B-29 Drops 21-Ton Trial Bomb in Penetration Test

WASHINGTON.—The world's biggest bomb, a 21-ton missile, has been dropped in a penetration test at Muroc army base in California.

The bomb, made by the army ordnance department, was not charged with explosive. The test was to find how fast the bomb would fall and how deep into the earth it would penetrate.

A specially equipped B-29 Superfortress took the bomb up and dropped it.

One thing the air force wanted to find out was the effect on a B-29 when such a big weight was suddenly released.

The army and air force are expected to keep secret virtually all details of the test.

The heaviest bomb dropped prior to the test was one of 12½ tons used in experiments in Germany by the United States air force and the British Royal air force.
